

Tomato: Valencia

Solanum lycopersicum

Quick Facts

- Matures 76 days from transplanting outdoors.
- Produces sunny orange fruits with full tomato flavor.
- Round, smooth fruits average 8-10 oz.
- Heirloom tomato with meaty interior and few seeds.
- Indeterminate variety.

Tips

This variety should be staked, trellised, or caged. Prune regularly for best results. Fruits ripen over extended period & are crack-resistant. These need well-drained soil rich in organic matter.

Instructions

Start seeds indoors 5-6 weeks before last frost date. Keep at 75-85° with moderate moisture. After 3-4 pairs of leaves appear, transplant into 4" pots. Grow at a constant 60-70° F until hardened off & ready to transplant outdoors after danger of frost.

- Full sun
- Seed planting depth: 1/4"
- Seed spacing: 2 - 3 feet
- Row spacing: 4 - 6 feet
- Plant height: 4 - 6 feet
- Germination: 5 - 7 days
